**Item Condition** Used

### Description

nsfer Projects, 15x12 Multifunction Swing Away Heat Press with 360 Rotation/Mica Heating/Knob-style (USED) Knob-style Control-Rotate the knob to the right to set the temperature and rotate it to the left to set the time. Compared with traditional heat presses, our upgraded heat press features a spacious digital screen that displays the temperature and time status at a glance and emits a notification when the predetermined time is achieved. Enjoy every operation and process confidently. Heat-up Fast & Evenly-By utilizing innovative Mica heating elements, our heating wire is capable of distributing heat more evenly and quickly compared to conventional heating tubes. Say goodbye to uneven heat transfers! In just 5 minutes, it can reach a temperature commonly used at 365 / 185, which is twice as fast as standard heating methods, significantly enhancing your production efficiency. ????6 in 1 Heat Press - Wide Application-Get ready to easily replace heating plates, cup presses, and hat heat

press accessories without tools, cutting time spent in half! Diversified heat presses help you create fantastic clothes, hats, mugs, canvas bags, pillowcases, and other personalized items. ???Easy to Use-Fully considering the beginner's troubles of repeatedly debugging parameters, we listed 12 common settings in the user manual for your reference to try and get your desired works. No more mistakes! ???360 Swing Away DesignBy using the 360 swing-away arm, the pressure is evenly distributed on the sublimation machine, resulting in better transfer quality. Additionally, this design allows for the heating element to be moved to the side, decreasing the likelihood of accidental contact. Large Heat Plate-The heat press comes with a large 15x 12 (38 x 29 cm) heat platen that is coated with Teflon, making it non-stick and stable. And guess what? Our professional heating plate can completely transfer patterns to clothes with delicate and vivid colors that never rub off. ???Safety Use-Safety is one of the biggest concerns with VEVOR heat press. By utilizing multi-layer insulation technology, the surface temperature of the heat press machine only reaches 45-60 despite a working temperature of 205. In contrast, traditional shirt press machines can reach temperatures as high as 70-100. AND swing away heat press will automatically shut up if you don't use it after 30 minutes. No worries you are going to burn the house down.
