LOT P136 - Masticating Juicer Machines, 3.5-inch, Slow Cold Press, Large Feed Chute, Easy to Clean

Item Condition Open Box - Not Tested

Description

\$130 Large Feed Chute This masticating juicer has a large 3.5-inch (88mm) feed chute that can fit the entire fruit into it, reducing preparation work. And the rotating feed chute can prevent hand injuries. 1 Large Spiral Auger The large spiral auger has a 3.2x6.3 inch (80x160mm) high torque spiral auger that can fully grind the pulp, increase the juice extraction rate by 30%, and reduce entanglement and blockage during the process. 1 High Power Motor The 250W high-power motor can effectively extract juice and reduce blockage. A juicer that operates with low noise does not affect others' rest. 1 Slag Juice Separation The slow juicer machine separates the juice at a speed of 120 revolutions, reducing damage to the cell walls of fruits and vegetables. You can get juice with less sediment, less oxidation, less nutrient loss, and a better and purer taste. 1 Easy to Clean Except for the machine body, all parts of the masticating juicer machine can be cleaned with water. The complimentary brush can help you clean more effectively. 1.
