LOT F23 - 2 ft. X 2 ft. 3300 Lumens Integrated LED White Lens Backlit Grid Ceiling White Panel, 4000K

Item Condition New

Description

\$54 Commercial Lighting LED backlit Troffers are the perfect solution for grid ceiling lighting needs. These commercial light fixtures are designed to save energy and lower maintenance costs. The integrated LED light source inside uses 50% less power to produce the same amount of light as fluorescent ceiling fixtures. The LED light source is built into the Troffer so you don't have to replace light bulbs ever. Because it's LED, you will never hear the hum that fluorescent light fixtures make. This Commercial Lighting Troffer uses only 30-Watt to provide 3300 Lumens of bright white 4000K CCT light. The sturdy frame is easy to handle and installs directly into a grid ceiling using the built-in T-bar clips. The white lens sits flush to the ceiling and distributes the light evenly; you won't see dark spots or tube lines. They accept 120/277-Volt input and are dimmable using a 0-10-Volt dimmer..

Quantity: 1
