LOT F27 - FLASHFORGE Adventurer 5M 3D Printer with Fully Auto Leveling, Max 600mm/s High Speed Printing, 280 C Direct Extruder with 3S Detachable Nozzle, Core XY All Metal Structure, Print Size 220x220x220mm

Item Condition Open Box - Not Tested

Description

\$379 One-Click Automatic Printing: Experience the future of 3D printing with the Adventurer 5M Series. Ensure impeccable bed leveling every time you print, without the need for manual adjustments. Effortlessly achieve consistent adhesion and flawless first layers, saving time and eliminating frustration. 12X Ultra Fast Printing: The AD5M uses a Core XY structure, with a travel speed of 600mm/s and 20000mm/s acceleration. Its unique lightweight design and stability boost efficiency, reduce

production cycles, and ensure high precision and quality, ideal for rapid prototyping and mass production. Your Smart Choice: Offers rapid nozzle changes in 3 seconds, a high-flow 32mm /s nozzle for stable high-speed printing With a quick 35-second warm-up to 200 C, dual-sided PEI platform for easy removal, and multiple platform options, it's a smart and efficient choice for creative projects. Superior Print Quality and Adaptability: Dual-fan nozzles, vibration compensation, multiple nozzle sizes (0.25, 0.4, 0.6, 0.8mm), and a 280 C direct extruder cater to various materials. From intricate details to rapid prototypes, superior results are achieved. Real-time APP Monitoring: It also supports the use of a mobile App-Flash Maker, allowing for remote real-time monitoring of print progress, adjustment of parameters, receiving message alerts, and other functionalities. These features enable intelligent operation, ensuring seamless and uninterrupted printing..
